BEST AVAILABLE IMAGES

Defective images within this document are accurate representations of the original documents submitted by the applicant.

Defects in the images may include (but are not limited to):

- BLACK BORDERS
- TEXT CUT OFF AT TOP, BOTTOM OR SIDES
- FADED TEXT
- ILLEGIBLE TEXT
- SKEWED/SLANTED IMAGES
- COLORED PHOTOS
- BLACK OR VERY BLACK AND WHITE DARK PHOTOS
- GRAY SCALE DOCUMENTS

IMAGES ARE BEST AVAILABLE COPY.

**As rescanning documents *will not* correct images,
please do not report the images to the
Image Problem Mailbox.**

INVESTOR IN PEOPLE

The Patent Office
Concept House
Cardiff Road
Newport
South Wales
NP10 8QQ

I, the undersigned, being an officer duly authorised in accordance with Section 74(1) and (4) of the Deregulation and Contracting Out Act 1994, to sign and issue certificates on behalf of the Comptroller-General, hereby certify that annexed hereto is a true copy of the documents as originally filed in connection with the patent application identified therein together with the Statement of inventorship and of right to grant of a Patent (Form 7/77), which was subsequently filed.

In accordance with the Patents (Companies Re-registration) Rules 1982, if a company named in this certificate and any accompanying documents has re-registered under the Companies Act 1980 with the same name as that with which it was registered immediately before re-registration save for the substitution as, or inclusion as, the last part of the name of the words "public limited company" or their equivalents in Welsh, references to the name of the company in this certificate and any accompanying documents shall be treated as references to the name with which it is so re-registered.

In accordance with the rules, the words "public limited company" may be replaced by p.l.c., plc, P.L.C. or PLC.

Re-registration under the Companies Act does not constitute a new legal entity but merely subjects the company to certain additional company law rules.

Signed

1.	Your reference	BP-09-0005	
2.	Patent application number (if you know it)	GB 00 20591.4	
3.	Full name of the or of each applicant	FMC CORPORATION	
4.	Title of the invention	MULTIPLE BORE CHRISTMAS TREE OUTLET	
5.	State how the applicant(s) derived the right from the inventor(s) to be granted a patent	By virtue of an Assignment effective 18 th August 2000 made between 1) the Inventor; 2) his employer, FMC Corporation (UK) Limited; and 3) the Applicants.	
6.	How many, if any, additional Patents Forms 7/77 are attached to this form (see note (c))	-	
7.	<p>I/We believe that the person(s) named over the page (and on any extra copies of this form) is/are the inventor(s) of the invention which the above patent application relates to.</p> <p>Signature <i>Martin Hammler</i> Date 28th November 2000</p>		
8.	Name and daytime telephone number of person to contact in the United Kingdom	Martin Hammler	020 7822 8888

Notes

- If you need help to fill in this form or you have any questions, please contact the Patent Office on 0645 500505.
- Write your answers in capital letters using black ink or you may type them.
- If there are more than three inventors, please write the names and addresses of the other inventors on the back of another Patents Form 7/77 and attach it to this form.
- When an application does not declare any priority, or declares priority from an earlier UK application, you must provide enough copies of this form so that the Patent Office can send one to each inventor who is not an applicant.
- Once you have filled in the form you must remember to sign and date it.

Enter the full name, address and postcodes of the inventors in the boxes and underline the surnames

Warning

After an application for a patent has been filed, the Comptroller of the Patent Office will consider whether publication or communication of the invention should be prohibited or restricted under Section 22 of the Patents Act 1977. You will be informed if it is necessary to prohibit or restrict your invention in this way. Furthermore, if you live in the United Kingdom, Section 23 of the Patents Act 1977 stops you from applying for a patent abroad without first getting written permission from the Patent Office unless an application has been filed at least 6 weeks beforehand in the United Kingdom for a patent for the same invention and either no direction prohibiting publication or communication has been given, or any such direction has been revoked.

Notes

- If you need help to fill in this form or you have any questions, please contact the Patent Office on 0645 500505.
- Write your answers in capital letters using black ink or you may type them.
- If there is not enough space for all the relevant details on any part of this form, please continue on a separate sheet of paper and write "see continuation sheet" in the relevant part(s). Any continuation sheet should be attached to this form.
- If you have answered 'Yes' Patents Form 7/77 will need to be filed.
- Once you have filled in the form you must remember to sign and date it.
- For details of the fee and ways to pay please contact the Patent Office.

MULTIPLE BORE CHRISTMAS TREE OUTLET

Field of the Invention

This invention relates to production outlets for large bore Christmas trees.

5

Invention Background

Traditionally, buoyant oil markets have provided the financial justification for the development of, and production from, multiple wells. However, current market circumstances dictate that whilst production volume must be maintained, it must be done
10 with a reduced number of wells. This has led to the development of larger bore production xmas trees.

Problem to be Solved

Large bore production xmas trees, particularly subsea trees utilising horizontal outlets,
15 present problems with outlet diameters. Current outlet valve technology accommodates outlets of up to 7" (178mm) diameter. Any production outlet with a diameter of over 7" (178 mm) will require the development of a new subsea gate valve, with the consequent costs involved, as well as the disadvantages of increased size and weight of the new design.

20

Summary of the Invention

The present invention solves the above problems by enabling the use of existing standard sized outlet valves and actuators in a large bore production tree. To that end, the present invention provides a production Christmas tree having multiple production outlets.
25 Splitting one large production outlet into two or more smaller outlets allows the use of existing subsea gate valves and actuators, with each production outlet being controlled by a separate, standard sized valve, thereby avoiding the cost of development of a new larger subsea gate valve. This system has the further benefit that pressure drops due to reservoir depletion, and associated flow assurance problems, can be alleviated by closing one of the
30 production outlets. Erosion problems are also reduced. Preferably each production outlet has a different diameter. By selecting different outlets or combinations of outlets, a

wide range of production flow rates can be catered for, as the reservoir pressure drops over the lifecycle of the field. In a preferred embodiment, two outlets are provided. These may be for example a 7" (178 mm) and a 5" (127 mm) outlet. However other diameters may be used, for example to suit smaller sized valves.

5

An illustrative embodiment of the invention is described below with reference to the drawings.

Brief Description of the Drawings

- 10 Fig. 1 schematically shows the vertical bore and single horizontal production outlet of a prior art large bore horizontal production tree, and
Fig. 2 schematically shows a dual production outlet horizontal tree embodying the invention.

15 Description of the Preferred Embodiment

The prior art horizontal xmas tree shown in Fig. 1 has a vertical through bore 10 and a single horizontal production outlet 12 branched off from the vertical bore 10. Annular seals 14, 16 surround the vertical bore 10 above and below the production outlet 12, to seal a tubing hanger (not shown) in the vertical bore 10. A gate valve 18 forming a
20 production master valve is situated in the production outlet 18.

In the embodiment of the invention shown in Fig. 2, the horizontal outlet 12 from the production bore is split into two separate outlets 20, 22. The outlet 20 is controlled by a 5" (127 mm) subsea gate valve 24 and actuator. Similarly, the outlet 22 is controlled by
25 a 7" (178 mm) subsea gate valve and actuator.

CLAIMS

1. A production Christmas tree having multiple production outlets.
- 5 2. A production Christmas tree as defined in claim 1, wherein each production outlet has a different diameter.
3. A production Christmas tree as defined in claim 1 or 2, comprising two said production outlets.
- 10 4. A production Christmas tree as defined in claim 3, wherein one of the outlets is of 7" (178 mm) diameter or smaller.
5. A production Christmas tree as defined in claim 4 wherein the other outlet is of 5" 15 (127 mm) diameter or smaller.
6. A production Christmas tree as defined in any preceding claim, being a horizontal tree.
- 20 7. A production Christmas tree having multiple production outlets, substantially as described with reference to or as shown in Fig. 2 of the drawings.

Abstract

[Fig. 2]

MULTIPLE BORE CHRISTMS TREE OUTLET

5

A large bore Christmas tree includes a production outlet 12 that is split into multiple separate outlets 20, 22, each controlled by a separate, standard sized valve and valve actuator 24, 26.
